GSE81608 pseudobulk per donor (descriptive; blue = ND, red = T2D; model-adjusted FDR across 9 genes in titles).
Delta/PP not testable (< 10 cells/donor). 6 T2D vs 10 ND donors: low power.
IL1R1
alpha: logFC +0.19, FDR 0.70 | beta: logFC -0.16, FDR 0.84
